

## CORPOLIPO

### SOLUCION INTEGRAL PARA CELULITIS INTEGRAL SOLUTION FOR CELLULITE

**CORPOLIPO** is the development of degraded fatty tissue that frequently contains water. This disorder results from one or several factors such as poor arterial or venous circulation, hormonal disturbances and problems with lymphatic drainage. Cellulite is due to the excessive storage of fat in the adiposities. By becoming heavily laden with lipids, the adiposities swell and become hypertrophic, sometimes to a high degree. The compression of the blood and lymph vessels by these fatty masses induces poor drainage of the water and stagnation of the toxins in the tissues. The resulting edema and degeneration of the fibers of the connective tissue lead to the typical irregular stippled appearance of the skin known as “orange peel appearance”.

#### What is it?

It is a precise, ideal mixing ratio of Phosphatidylcholine, sodium deoxycholate, L-Carnitine, rutin, Caffeine, Cynara Scolymus Leaf Extract, Meliloyus Officinalis Extract, Sodium Benzoate, Sodium Hydroxide  
Indication: Localized Obesity, Body Shaping, Weight Loss

#### What is it for?

We present a mixture which synergizes the nutritional effects of the trace elements in the metabolic system, with powerful recognized lipolytics. Ideal for dealing with adipose tissues and obesity in any person. Particularly recommended for patients who have traditionally been subjected to diets poor in nutrients, hoping to lose weight, although also of great use in slimming treatments and treatment to adipose tissues in people who do not wish to miss out nutritionally due to restricted diets. In addition to noticeably decreasing the volume of the adipose tissues and body fat, flaccidity becomes less evident when using this kind of mixture and patients do not notice a decrease in their capacity for physical performance and resistance to effort. Quite the contrary, it boosts their energetic synthesis.

#### Protocol of application:

Micro needle ling system, **Derma Roll**, electro oration, electrophoresis, iontophoresis or other non-inva techniques improving skin bio-availability of product

**Main Ingredients:** Aqua, L-Carnitine, Phosphatidylcholine, Polysorbate 80, Sodium Deoxycholate, Rutin, Caffeine, Cynara Scolymus Leaf Extract, Meliloyus Officinalis Extract, Sodium Benzoate, Sodium Hydroxide

**How supplied:** **CORPOLIPO** box contains 10 sterile vials of 5ml each, for single use

#### Frequency:

1 sessions / week

1 protocol = 4 – 6 sessions average

**Average volume/session:** 5 ml / area, maximum 10 ml / session for both side

**Recommended number of sessions:** Repeat protocol as necessary

## Indications:

- Localized fat deposits: double chin, thighs, buttocks, legs, knees, abdomen, back, bags under eyes
- Buffalo neck
- Lipomas
- Repair orange skin
- Enhance skin tone
- Stimulate skin firmness
- Increase skin elasticity
- Detoxification tissues
- Remove skin water excess
- Increase superficial blood microcirculation
- Moisturize and nourish the skin
- Antiradical effect

## Ingredients effect:

### L-Carnitine

**Corpolipo Solution** | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

In its natural form in the body, L-Carnitine is responsible for metabolizing fat. After breaking down the stored fat, it mobilizes the fatty acids into the bloodstream, attaching itself to them and carrying them to the area of the cell that converts fat to energy. **Corpolipo** Solution is essential for optimal fat burning.

### Phosphatidylcholine

**Corpolipo Solution** | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

Naturally abundant in cell membranes, these phospholipids', breaks down the fat stored in fat cells. Phosphatidylcholine **Corpolipo** Solution emulsifies the fat, allowing it to be absorbed into the bloodstream and transported. This makes it the ideal solution for eliminating unattractive, localized adiposities.

### Rutin

**Corpolipo Solution** | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

It is a flavonoid obtained by extraction from Sophora japonica plant material. It is vitally important for its ability to increase the resistance of the capillaries (blood vessels) and regulate their permeability. It helps vitamin C in the collagen maintenance of intercellular cement. In a healthy state, it is essential for the proper absorption and use of vitamin C, which is a powerful antioxidant. It is a facilitator of post-traumatic neoangiogenesis. It has anti-infectious effects.

## Sodium Deoxycholate

Corpolipo Solution | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

It is a sodium salt derived from deoxycholic acid. Deoxycholic acid, which is a bile acid, also called cholanoic acid, is one of the four main acids produced by the liver and is a very important active component in the bile in its function of emulsifying fats that reach the digestive tract through ingestion, so that it can carry out its digestion and consequent absorption. It is widely used in pharmaceuticals as an ingredient for preparations against dyspepsia and constipation; it is also used to emulsify oily preparations in water for parenteral use, in particular, phosphatidylcholine injections. Its success in these preparations has been such that some authors have proposed that the therapeutic utility in the aesthetic handling of adiposities is due to its surfactant activity on the fatty tissue, which facilitates the mobilization of local lipids towards the vascular system by means of manual techniques and electrical impulses.

## Caffeine

Corpolipo Solution | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

Works to increase blood flow and stimulate adiposities to release fat into the bloodstream, so that it can be burned by the body's metabolism. In simple terms, Caffeine Reducing Solution drains the body's fat cells. In parallel, Caffeine Reducing Solution tightens and tones the skin, helping to reduce the appearance of cellulite. When applied topically, it works to act as a lipolytic agent, breaking down the fat tissue and causing localized weight loss, without incurring any side effects.

## Cynara Scolymus Leaf Extract

Corpolipo Solution | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

The secret behind the anti-cellulite properties of this extract lies in its detoxifying and diuretic action. Also known as Cynara Scolymus, with the active ingredient Cynara, it is widely used to treat cellulite and fat. In addition, Artichoke Extract Anti-Cellulite Solution works to help stimulate the lymphatic drainage system.
