

## **ROSTROBLANC**

### SOLUCION INTEGRAL PARA SUAVIZAR LAS MANCHAS DE LA PIEL SOLUTION FOR SKIN BLEMISHES

**ROSTROBLANC** effects on reduction and prevention of hyper pigmentation by decreasing the melanin synthesis, Improves and inhibits hyper pigmentation by curbing melanin synthesis and Combats age spots Reduces and prevents hyper pigmentation and fights aged spots in the skin. Improves and inhibits hyper pigmentation by curbing melanin synthesis, combats age spots

#### **Protocol of application:**

Micro needle ling system, **Derma Roll**, electro oration, electrophoresis, iontophoresis or other non-inva techniques improving skin bio-availability of product

#### **Main Ingredients:**

Aqua, Ascorbic Acid, Glutathione, Arbutin, Glycolic Acid, Sodium Hydroxide

#### **How supplied:**

**ROSTROBLANC** box contains 10 sterile vials of 5ml each, for single use

#### **Frequency:**

1 session / week

1 protocol = 4 sessions average

#### **Average volume/session:**

1,5 ml / **area**, maximum 5 ml / session

#### **Recommended number of sessions:**

Repeat protocol as necessary

#### **Indications:**

- Hyper pigmentation
- neven Skin Tone
- Melasma
- Inhibit melanin pigment
- Equalize uneven skin color
- Whiten the skin
- Brightening effect
- Antioxidant effect
- Increase epidermal turn over
- Enhance skin elasticity and hydration

## Ingredients effect:

### Glutathione

Rostroblanc Solution | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

Glutathione plays an important role in cell protection during ageing, acting both as an antioxidant and a detoxifying agent. Glutathione's ability to inhibit melanin synthesis makes it an essential component of melasma and depigmentation treatments.

### Arbutin

Rostroblanc Solution | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

Arbutin protect the skin against damage caused by free radicals, Arbutin is a skin whitening agent for skin depigmentation, Arbutin inhibits the formation of melanin pigment by inhibiting Tyrosine's activity.

Arbutin is very safe skin agent which does not have toxicity, stimulation, unpleasant odor or side effect such as Hydroquinone. The encapsulation of Arbutin constitutes a delivery system to potentialize the effect in time. It is a way to incorporate the hydrophilic Arbutin in lipophilic media. Arbutin give three main properties; Whitening effects, anti- age effect and UVB/ UVC filter

### Glycolic Acid

Rostroblanc Solution | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

It is the most common alpha hydroxyl acid (AHA). It stimulates new growth of skin, collagen and elastin. As well as working to diminish brown spots and hyper pigmentation, it also reduces fine lines, wrinkles, acne, scars and other signs of ageing. Glycolic Acid Brightening Solution prevents dead cells from clumping together, thus increasing cell turnover. The skin appears bright and rejuvenated, reflecting a healthy glow.

### Vitamin C (Ascorbic Acid)

Rostroblanc Solution | 5 ml Vial 0.175 fl. oz. Mesotherapy Serum

---

A very effective antioxidant that neutralizes free radicals – the unstable molecules, which age the skin as a result of pollution, smoking and exposure to the sun. It inhibits melanin, stimulates growth of the hydro-lipid film and enhances collagen synthesis, an important skin protein that strengthens the structural support and elasticity of the skin. Vitamin C Revitalizing & Antioxidant Solution is used mainly to treat and prevent photo ageing, uneven complexions and for helping the skin to fight wrinkles.
